DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-9, 11-18, 21, 22, 24-27 and 29-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miyatake et al. 2003/0181573, in view of General Electric EP 0 900 827.

4. Miyatake et al. disclose polycarbonate, polyorganosiloxane-containing graft copolymer as a flame retardant and fluoro resin in claim 1, MBS impact modifiers in paragraph 0104 and halogen-free flame-retardants in paragraphs 0105-0107. General Electric teaches an impact resistant carbonate polymer containing an impact modifier having a pH of 3-8 in claims 1-12 and a preferred composition in paragraphs 0051-0052.

Art Unit: 1714

It would have been obvious to one having ordinary skill in the art; at the time the invention was made, to use the impact modifier of General Electric in the composition of Miyatake et al., in order to improve the melt stability of the composition.

Allowable Subject Matter

5. Claims 10, 19, 20, 23, 28 and 33-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Szekely whose telephone number is (571) 272-1124. The examiner can normally be reached on 7:00 a.m.-5:30 p.m. Tuesday-Friday.
